‡*Example Institute of Chemistry, Beijing 100190, China*

E-mail: first.author@example.edu

Abstract

This document demonstrates the official ACS `achemso` class configured for *ACS Nano*. It is a template, not a real manuscript: replace the front matter, body text, figures, tables, and references with your own material.

Abbreviations

a.u., arbitrary units

Keywords

template, LaTeX, American Chemical Society, ACS Nano

Introduction

This document is a submission template for *ACS Nano*. It is typeset with the publisher's official LaTeX document class; the class, not this file, controls the page layout, fonts, and reference formatting. Every piece of text in this sample—including the author names, affiliations, abstract, and references—is a placeholder.[1,2]

Table 1: An example table typeset with `booktabs`. Replace it with your own data.

Item	Value	Unit
Alpha	1.0	a.u.
Beta	2.0	a.u.

Replace the sample material with your own manuscript, but keep the document class and the front-matter commands unchanged. Check the journal's current Guide for Authors before submission because article types, word limits, and reference styles can change.

Using this template

- Edit `main.tex` only; the accompanying `.cls`, `.sty`, and `.bst` files are official files and must remain unmodified.
- Put figures in `figures/` and include them with `\includegraphics`; a sample vector figure is already provided.
- Replace the entries in `references.bib` and cite them with `\cite`. The two entries shipped with the template are examples.
- Build the PDF with `latexmk -pdf main.tex`.

Mathematics, tables, and figures

Inline mathematics such as $E = mc^2$ and displayed equations are supported:

$$\int_{-\infty}^{\infty} e^{-x^2}\,\mathrm{d}x = \sqrt{\pi}. \tag{1}$$

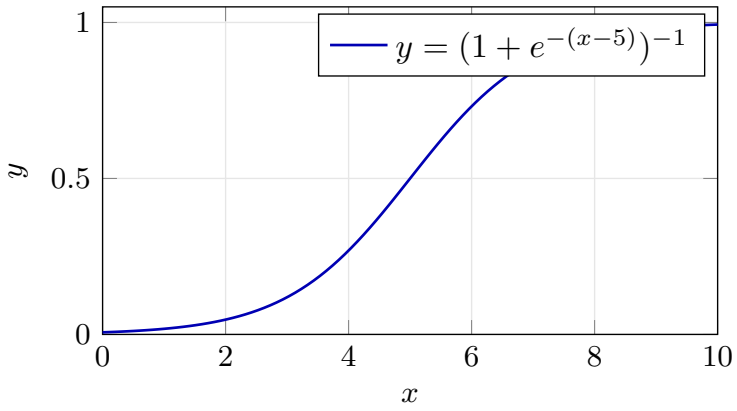

Figure 1: An example vector figure. Replace the file in `figures/` with your own artwork.

Conclusion

Replace this paragraph with the conclusion of your manuscript. The template is intentionally minimal: journal-specific requirements should be taken from the current author guidelines rather than added as local formatting hacks.

Associated content

Supporting Information is not included in this template. Add it here when your manuscript requires it.
