Abstract

This document demonstrates the official Elsevier `elsarticle` class configured for *Progress in Energy and Combustion Science*. It is a template, not a real manuscript: replace the front matter, body text, figures, tables, and references with your own material.

Keywords: template, LaTeX, Elsevier, Progress in Energy and Combustion Science

[d]*Example Research Institute, Beijing, 100190, China*

1. Introduction

This document is a submission template for *Progress in Energy and Combustion Science*. It is typeset with the publisher's official LaTeX document class; the class, not this file, controls the page layout, fonts, and reference formatting. Every piece of text in this sample—including the author names, affiliations, abstract, and references—is a placeholder [1, 2].

Replace the sample material with your own manuscript, but keep the document class and the front-matter commands unchanged. Check the journal's current Guide for Authors before submission because article types, word limits, and reference styles can change.

2. Using this template

- Edit `main.tex` only; the accompanying `.cls`, `.sty`, and `.bst` files are official files and must remain unmodified.
- Put figures in `figures/` and include them with `\includegraphics`; a sample vector figure is already provided.
- Replace the entries in `references.bib` and cite them with `\cite`. The two entries shipped with the template are examples.
- Build the PDF with `latexmk -pdf main.tex`.

Table 1: An example table typeset with `booktabs`. Replace it with your own data.

Item	Value	Unit
Alpha	1.0	a.u.
Beta	2.0	a.u.

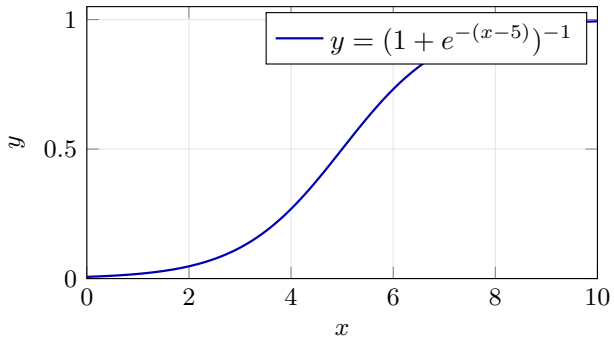

Figure 1: An example vector figure. Replace the file in `figures/` with your own artwork.

3. Mathematics, tables, and figures

Inline mathematics such as $E = mc^2$ and displayed equations are supported:

$$\int_{-\infty}^{\infty} e^{-x^2}\,\mathrm{d}x = \sqrt{\pi}. \tag{1}$$

4. Conclusion

Replace this paragraph with the conclusion of your manuscript. The template is intentionally minimal: journal-specific requirements should be taken from the current author guidelines rather than added as local formatting hacks.

Declaration of competing interest

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence this work.

Data availability

Data sharing is not applicable to this template article.
